Storm Data and Unusual Weather Phenomena

June 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage	Character of Storm
					Killed	Injured	Property Crops	

VIRGINIA, Northwest

Dickenson County

Birchleaf to Trammel	27	0615EST 0730EST			0	0	2K	Flash Flood
----------------------	----	--------------------	--	--	---	---	----	-------------

Small streams flooded Routes 80 and 63.

Dickenson County

Birchleaf to Clinchco	27	1830EST 2100EST			0	0	100K	Flash Flood
-----------------------	----	--------------------	--	--	---	---	------	-------------

Localized downpours trained over the Turner and Edwards Ridge vicinity between 1730 and 1900E. The ground was wet from previous rains. Rain estimates were on the order of 2 to 2.5 inches. Small streams flowing in different directions off the higher ridges briefly flooded. This included streams such as Road Branch, Turkey Branch, and Crooked Branch

One house along Road Branch sustained about \$20,000 damage. Another home along Turkey Branch was damaged. Playground equipment and fencing were damaged at the elementary school along Crooked Branch. Across this rugged terrain, mudslides affected several roads. Walk bridges were also damaged.

WEST VIRGINIA, West

Barbour County

Belington	01	1730EST			0	6		Lightning
-----------	----	---------	--	--	---	---	--	-----------

Lightning struck the Belington Wellness Center, sending an electrical charge inside the building. Six people were shocked, while inside, using the hot tub. The victims were treated and released.

Barbour County

Belington	01	1915EST 2030EST			0	0	50K	Flash Flood
-----------	----	--------------------	--	--	---	---	-----	-------------

A small complex of showers and thunderstorms trained over the northern sections of Belington, affecting the Mill Creek drainage. Rain was estimated around 3 inches in 2 hours in a small localized area. The cooperative observer at Belington measured 2.38 inches in less than 2 hours.

An assessment of damage by the state included 3 houses with minor damage. Three other houses were affected, as water surrounded them or outbuildings were flooded. The carpet in 2 classrooms of the elementary school was damaged. Several roads were briefly closed, including Routes 92 and 250.

Logan County

Lyburn	04	1203EST			0	0		Hail(1.00)
--------	----	---------	--	--	---	---	--	------------

McDowell County

Welch	04	1229EST			0	0		Hail(0.75)
-------	----	---------	--	--	---	---	--	------------

McDowell County

Premier	04	1238EST			0	0		Hail(0.88)
---------	----	---------	--	--	---	---	--	------------

Wood County

Mineral Wells	04	1346EST			0	0		Hail(0.75)
---------------	----	---------	--	--	---	---	--	------------

Jackson County

1 N Sandyville	04	1350EST			0	0		Hail(0.88)
----------------	----	---------	--	--	---	---	--	------------

Doddridge County

4 NE West Union	04	1400EST			0	0		Thunderstorm Wind (EG50)
-----------------	----	---------	--	--	---	---	--	--------------------------

Trees were blown down along County Route 14.

Calhoun County

Grantsville	04	1442EST			0	0		Hail(0.88)
-------------	----	---------	--	--	---	---	--	------------

WEST VIRGINIA, West

Raleigh County

Crab Orchard to Coal City	26	1400EST 1500EST			0	0	2K		Flash Flood
--------------------------------------	----	--------------------	--	--	---	---	----	--	--------------------

Small streams flooded and closed roads. No dwellings were affected.

Webster County

Dyer	27	1000EST 1130EST			0	0	2K		Flood
-------------	----	--------------------	--	--	---	---	----	--	--------------

The Williams River and its feeder streams flooded campsites and roads.

Randolph County

Monterville	27	1030EST 1130EST			0	0	2K		Flash Flood
--------------------	----	--------------------	--	--	---	---	----	--	--------------------

Small streams flooded roads.

A stalled frontal system and a southeast tropical feed of moisture caused 3 day rain totals, from Saturday the 24th to 1800E on Tuesday the 27th, of 2.5 to 6.7 inches in Pocahontas and Randolph Counties. This was on the western fringe of a much larger event along the Mid Atlantic states. Automatic gauges on Brushy Mountain and at Woodrow in Pocahontas County had around 6.7 inches of rain for the event. Some of the heavier rain totals from cooperative observers were 6.5 inches at Snowshoe, 5.3 inches at Webster Springs, and 4.8 inches at Valley Head. Luckily, prior to the event, the ground was dry and the streams were running at their usual low summer level. However, minor flooding of small streams and headwater rivers did eventually occur, especially on the 26th into the 27th.
